The Official MCU Series Slate

Volume 11 — the companion to the film slate in Volume 04. **We use the real MCU series slate**: the same titles and premiere dates. The only change is that Disney's streaming service, Disney+, is **Donohue+**, and Donohue owns ABC, Hulu and Freeform as Disney did. Netflix is unchanged. Every story is made comic-accurate under Volumes 01 through 03.

Fictional actors keep their roles across film and TV. For example: Grace Bullock leads *WandaVision*, Tyler Chapman co-leads *The Falcon and the Winter Soldier*, Arianna Cummings leads *Hawkeye* as Claire Barton, and Amond Baker appears in *She-Hulk*. Animated series use each character's actor where the real actor voiced their own role.

F. Promotional Shorts

Title	Years	Notes
Team Thor mockumentary shorts (3 parts)	2016-2018	Thor shares an apartment in Australia with an office worker named Darryl. **Esther Smilley** plays Thor, and it's the most comedic work of her career.

Open Questions (recommendation first)

- **Canon status:** all Marvel Television series (ABC, Netflix, Hulu, Freeform) count as full MCU canon. Agree?
- **Hawkeye and Kate Bishop:** Claire Barton mentors Kate Bishop, who becomes a second Hawkeye *alongside* Claire. Claire stays Hawkeye and never retires or hands over the title, consistent with your no-torch-passing rule.
- **Thor and Jane Foster (film note):** *Thor: Love and Thunder* (2022) is the real film in which Jane Foster becomes the Mighty Thor. Since our Thor has always been a woman, my recommendation is that Jane wields Mjolnir as a **second Thor alongside** Esther's Thor, as in the comics, where more than one person has been worthy. Esther's Thor stays the one true Thor.
